

National Association of State Departments of Agriculture

Subject of Action Item E:

Uniform Industry Standards for Industrial Hemp

Submitted by:

Commissioner Don Brown, Colorado; Secretary Jeff Witte, New Mexico; Director Ben Thomas, Montana; Commissioner LuAnn Adams, Utah

Text of Action Item:

NASDA supports the development of uniform industry standards including the establishment of consistent procedures for states that require testing, for field sampling, sample preparation, and the testing of industrial hemp for THC by the gas chromatography method. NASDA encourages state adoption of uniform industry standards to avoid a patchwork of testing and grading criteria throughout the states. NASDA Members call for a working group of states to identify these standards for which state departments of agriculture will administer industrial hemp programs under.

Adopted:

September 11, 2018
